Professional Summary

Passionate Full-Stack Developer specializing in building robust, scalable web applications using the MEAN stack and .NET technologies. Strong focus on architecting secure, API-driven backends, designing efficient databases, and collaborating effectively across development teams to deliver comprehensive software solutions.

Technical Skills

- **Backend & Databases:** Node.js, Express.js, .NET Core, C#, MongoDB, SQL.
- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap.
- **Additional Technologies:** Flutter, Dart.
- **Concepts & Tools:** RESTful APIs, System Architecture, Object-Oriented Programming (OOP), Git/GitHub.

Experience & Internships

MEAN Stack Development Internship | NTI (National Telecommunication Institute) | 2026

- Developed full-stack web applications featuring 15+ RESTful API endpoints using Node.js and Express, integrated with MongoDB databases.
- Collaborated with an agile team of 3 developers to build scalable end-to-end solutions, improving application data flow efficiency by an estimated 20%.

Software Development Internship in .NET | Orascom | 2025

- Engineered "IT REQ IN ORASCOM," a .NET desktop application utilizing WinForms and SQL Server to automate internal IT workflow requests.
- Engineered the "IT REQ IN ORASCOM" application using .NET, WinForms, and SQL Server to digitize IT workflows; deployed across 15 departments, reducing manual processing time by an estimated 30%.

Mobile App Development Internship | ITI (Information Technology Institute) | 2025

- Built 2 cross-platform mobile applications using Flutter and Firebase, implementing real-time database synchronization.
- Optimized client-side data consumption and mobile-backend API integration, reducing data fetch time by 25% and ensuring smooth performance with low latency.

Selected Projects

Tareqy (2026)

- Developed a comprehensive web platform for programmers using Angular and Node.js, supporting 5+ different learning roadmaps and secure user authentication.

Games Store (2026)

- Architected a fast MEAN stack web application, designing a scalable backend database to handle 50+ game profiles and user interactions.

Delicious Cake Shop (2026) Built a responsive e-commerce web app using Node.js and Bootstrap, featuring a streamlined checkout process optimized to under 3 steps.

Education

Bachelor of Computer Science | Minya University | Expected Graduation: 2028
